
Service Capability Statement

Strong foundations. Clear governance.
Confident security.

WHO WE ARE

Purpose-built for enterprise security

FortressPoint Consulting Ltd is a specialist cybersecurity and governance consultancy registered in both England & Wales and Nigeria. We were founded to address a clear gap in the market: the absence of a consultancy with genuine depth across both the UK enterprise and Nigerian enterprise landscapes.

We combine senior advisory capability with hands-on technical delivery — serving financial services institutions, telecommunications providers, healthcare organisations, technology companies, and public sector bodies across both markets. Our dual-market presence is not incidental. It reflects our founders' experience operating across both regulatory environments and our commitment to delivering the same standard of security consultancy in Lagos as in London.

OUR POSITIONING

UK Market	Nigerian Market
Deep expertise in UK GDPR, NCSC Cyber Essentials, ISO 27001, and CREST. We are a regulated financial services provider under the FCA's Regulated Financial Services (RFS) regime.	Specialist expertise in Nigerian enterprise security, including NISIRI, NDPR 2023, and Cyber Essentials. We are a regulated financial services provider under the CBN's Regulated Financial Services (RFS) regime.

WHAT WE DELIVER

Our 12 integrated service lines

Our service lines are designed to work independently or as an integrated programme. Whether you need a targeted technical engagement or a comprehensive security transformation, FortressPoint delivers.

01

Cybersecurity Strategy & Architecture

End-to-end security strategy aligned to your business objectives, with Zero Trust principles at its core.

- Security operating model design
- Threat modelling & risk registers
- Security architecture review
- Zero Trust architecture (NIST SP 800-207)
- Zscaler ZIA/ZPA design & implementation
- Technology roadmap

02

Governance, Risk & Compliance

Robust GRC frameworks covering UK, EU, and Nigerian regulatory requirements including data governance.

- ISO 27001 implementation
- UK GDPR & NDPA 2023 compliance
- Data governance framework design
- Microsoft Purview deployment
- CBN / NCC / NITDA advisory
- Third-party risk management

03

Cloud, Azure & Identity Security

End-to-end Microsoft Azure security and identity architecture — from Entra ID to Sentinel SIEM.

- Azure security architecture
- Entra ID hardening & Conditional Access
- Privileged Identity Management (PIM)
- Microsoft Intune BYOD
- Defender for Endpoint
- Sentinel SIEM & identity governance

04

Vulnerability & Exposure Management

Continuous identification, prioritisation, and remediation of vulnerabilities across your environment.

- Tenable vulnerability scanning
- CTEM programme delivery
- Risk-based prioritisation
- Attack surface management
- Patch management governance
- Executive metrics & reporting

05

AI Governance

EU AI Act, NIST AI RMF aligned governance for organisations developing or deploying AI systems.

- AI risk assessment & classification
- AI governance frameworks
- EU AI Act compliance readiness
- Model transparency & bias controls
- AI vendor risk management
- Board AI governance advisory

06

vCISO & Advisory Services

Fractional CISO services — board-level security leadership at the scale that makes commercial sense.

- Fractional CISO engagement
- Security committee representation
- Incident response leadership
- Security investment planning
- Regulatory liaison
- Programme oversight & accountability

07

Security Awareness & Training

Targeted programmes that build a security-conscious culture sustaining your technical controls.

- Executive & board security briefings
- Company-wide awareness campaigns
- Phishing simulation programmes
- Role-based technical training
- Security culture measurement

HOW WE WORK

Our delivery approach

01	02	03	04
Discover & Assess	Design & Plan	Deliver & Implement	Assure & Improve
Structured discovery to understand your business context, existing controls, regulatory obligations, and threat landscape before any recommendation is made.	Solutions designed against your specific requirements, mapped to recognised frameworks, and sized to your capacity to absorb and sustain change.	Technical delivery with full documentation, configuration guides, and traceability matrices. Every deliverable is branded, structured, and audit-ready.	Post-delivery assurance ensures controls are embedded, staff are trained, and the programme is positioned for continuous improvement.

WHY FORTRESSPOINT

What sets us apart

Dual-market expertise

Registered and operating in both the UK and Nigeria with deep understanding of both regulatory environments — from UK GDPR and NCSC guidance to NDPA 2023, CBN, and NCC frameworks.

Senior-led delivery

Every client engagement is led by senior practitioners. We do not hand projects to junior consultants after the sale. The expertise you see in our pitch is the expertise that delivers your programme.

Microsoft ecosystem depth

Certified expertise in Azure security, Microsoft 365, Defender suite, Intune, Sentinel, and Entra ID — the tools your enterprise already relies on, deployed and configured by specialists who know them deeply.

Business-aligned delivery

Security recommendations anchored in commercial reality. We build what you can operate and sustain — not what looks impressive in a slide deck.

Audit-ready documentation

Every engagement produces fully documented, traceable, auditable deliverables. Our work stands up in boardrooms, courtrooms, and audit rooms.

Technology partnerships

Formal relationships with Microsoft, Tenable, and Zscaler ensure access to the latest threat intelligence, tooling, and technical support for our clients.

"Security is not a product you buy. It is a posture you build — methodically, deliberately, and with full understanding of what you are protecting and why."
